Sue Ann Ioanis

Lead Software Engineer at Mastercard

New York City Metropolitan Area

Experience

Mastercard

Lead Software Engineer

2022 - 2023 (1 year)

New York, New York, United States

Mastercard operates on a massive global scale, with its payment network handling trillions of dollars in transactions annually. I led the design, development, and maintenance of key software systems on multiple teams for the Mastercard Developer Platform, enabling third-party developers and internal teams to securely interact with Mastercard APIs and services.

Iterable

Senior Software Engineer

2020 - 2021 (1 year)

New York, New York, United States

Iterable offers a cutting-edge platform that enables brands to deliver highly personalized, data-driven customer experiences at scale. I focused on and built out data science and machine learning aspects of the platform. This involved developing sophisticated systems that leveraged predictive analytics and machine learning models to enhance customer journey personalization, optimize marketing strategies, and enable real-time decision-making.

OkCupid

Senior Software Engineer

2020 - 2020 (less than a year)

New York, New York, United States

OkCupid is a pioneering platform in the online dating world, known for its data-driven approach to matchmaking and its inclusive, forward-thinking values.
I focused on and built several key monetization services that helped drive revenue growth while maintaining a seamless user experience.

LeafLink

Senior Software Engineer

2019 - 2020 (1 year)

New York, New York, United States

LeafLink is the largest wholesale marketplace for the cannabis industry, revolutionizing how businesses in this fast-growing sector operate. I focused on and built out CRM and eCommerce systems that empowered businesses to manage their customer relationships and sales processes more effectively.

Resy
Software Engineer
2018 - 2019 (1 year)
New York, New York, United States

Resy is a leading restaurant technology platform that revolutionized the way people discover and book dining experiences. I focused on and built restaurant technology and consumer-facing systems at Resy. I also worked closely with restaurant groups to develop customized solutions and improve their operations. During my time there, Resy was acquired by American Express.

Bitly
2 years

Application Engineer
2017 - 2018 (1 year)
New York, New York, United States

Bitly is the world's most popular link management platform, trusted by brands globally to shorten, customize, and track links for optimized digital marketing and data-driven decision-making. I delivered and maintained key features for the enterprise Software-as-a-Service (SaaS) application, working cross-functionally with product managers, designers, and engineering teams. During my time there, Bitly was acquired by Spectrum.

Engineer
2016 - 2017 (1 year)
New York, New York, United States

Deutsch LA
Engineer
2015 - 2016 (1 year)
Los Angeles, California, United States

Award-winning work with Volkswagen. Worked with multiple clients.
